

Machine Learning Laboratory
Department of Computer Science
Old Dominion University
Norfolk, VA 23529, USA

The Machine Learning Laboratory at Old Dominion University (ODU) is actively recruiting highly qualified and motivated PhD students. The Machine Learning Laboratory conducts cutting-edge research in machine learning, data mining, and computational biology. The available positions will cover full tuition and offer competitive salary. The candidates are expected to work towards their PhD degrees in machine learning and/or computational biology starting immediately. The candidates should satisfy the following requirements, but exceptional candidates from diverse backgrounds will be considered.

1. Research experiences in at least one of the following areas: machine learning, data mining, or computational biology;
2. Strong mathematical backgrounds in numerical linear algebra, probability and statistics, convex and numerical optimization;
3. Strong programming skills (e.g., C/C++, MATLAB, R);
4. Knowledge and experiences in image processing and biology will be a plus.

The interested candidates should apply for the Computer Science PhD program of ODU via the regular application process. More information can be found at Dr. Shuiwang Ji's homepage <http://www.cs.odu.edu/~sji/> or via E-mail inquiry (sji@cs.odu.edu).
